

Hi, I'm Haley Barbour.

From the Natchez Trace to our famous Delta ... from the Piney Woods to our gorgeous Gulf Coast, Mississippi's natural beauty is a point of pride.

Here in Mississippi, we've had a lot of experience dealing with nature. And protecting our natural resources is important to us.

That's why I'm happy to announce Mississippi's support for EcoDriving.

EcoDriving is a way for all drivers to improve fuel efficiency while reducing emissions by making a few simple changes to driving and vehicle maintenance habits.

Each of us can improve our vehicle's mileage by as much as 15 percent by practicing EcoDriving,

It's been estimated Mississippi drivers could save roughly **250 million gallons** of gas a year – that's a reduction of more than 2.4 million tons of CO<sub>2</sub> annually – if all Mississippi drivers practiced EcoDriving.

Join me in helping to spread the word about EcoDriving. And visit the EcoDriving Web site – [www.EcoDrivingUSA.org](http://www.EcoDrivingUSA.org) – for helpful tips to make your driving habits more efficient.

Working together, we can preserve our beautiful state and its natural resources for generations to come.
